SUMMARY

Passionate Flutter developer with a knack for building clean, scalable, and high-performance mobile apps. Experienced in creating cross-platform solutions with a strong focus on UI/UX, state management (BLoC, Cubit, Provider, Riverpod), Firebase integration, and building offline-first applications with robust local data synchronization and seamless offline user experiences.

PROJECTS

Logistifie Passenger and driver   **Play store link**   **App store link**

- Developed and maintained Logistifie Passenger & Driver App, a chauffeur service platform with features including real-time tracking, in-app turn-by-turn navigation, and deep link support. Implemented complex CI/CD pipelines to ensure seamless deployment, scalability, and reliable app performance for both passenger and driver applications.

Twiila   **Play store link**   **App store link**

- Twiila – A mobile shopping app designed to bring a wide range of clothing stores together in one convenient platform. Twiila allows users to browse, discover, and shop from multiple fashion brands with ease, offering a seamless and personalized retail experience directly from their fingertips.

Kiwi school   **Play store link**

- Kiwi – Smart School & Learning Management App .Kiwi is a modern, all-in-one School Management and Learning Management System (LMS) app designed to simplify academic operations and enhance digital learning. Whether you're an administrator, teacher, student, or parent, Kiwi provides a seamless platform to manage, track, and engage with everything related to education—from classroom learning to school operations.

Roldrive   **Play store link**   **App store link**

- A premium chauffeur booking app that redefines luxury travel. Designed for both business and leisure, RolDrive offers seamless private transportation services with a focus on punctuality, comfort, and sophistication. Currently operating in the UK and Dubai, the app supports bookings for airport transfers, corporate travel, sightseeing tours, and weddings. Users can choose from an extensive fleet, including electric vehicles, through a sleek and intuitive interface.

Layla

- Layla, a ChatGPT-clone mobile app using Flutter and OpenAI API for conversational AI. Integrated Stripe for subscription-based payments, Firestore for real-time data storage, and Firebase Authentication for secure user management. Designed to deliver a scalable, cross-platform AI chat experience with smooth payment and authentication flows

PROFESSIONAL EXPERIENCE

Amnet digital   **Jan 2026 - Current**

- Architected a robust offline-first synchronization engine for a high-concurrency enterprise mobile app, ensuring 100% data integrity during intermittent network connectivity.
- Implemented a custom "Outbox Pattern" using SQLite (sqflite) to manage background data synchronization, featuring atomic transactions to prevent data loss during app crashes or hardware failures

Logistifie Pvt Ltd   **July 2024 - Jan 2026**

- Lead the mobile app development team and drove the complete development cycle of the Flutter application from scratch.
- Gathered and analysed client requirements to design and implement scalable technical solutions.
- Managed server infrastructure, backend integrations, and deployment processes.
- Delivered a stable, production-ready Chauffeur service Applications to (Passenger and Driver) that has 500+ downloads
